

Quality Assurance Performance Improvement (QAPI) regulations have challenged providers to search for educational tools that focus on the roles and responsibilities of front line staff in maintaining a QAPI Culture. CAHF's Quality Improvement Subcommittee has developed a comprehensive educational program, "QAPI THAT", directed towards certified nursing assistants, housekeepers, food and nutritional service staff, activities staff and many others. This program was designed for facility educators to deliver the essentials of QAPI to those that make this program a day to day reality. The "QAPI THAT" toolkit is complete with a power point presentation, lesson plan, instructor guide and modules that can be adapted for specific needs. The QAPI journey is rewarding for everyone, so toss this in your QAPI Tool Box and reach for it as part of your orientation program, today!
